

■ Application:

The *DuraHandFormer®* is widely used in the latex industry for the production of rubber gloves for use in surgical procedures, examination, home and industry (PVC gloves), as well as for the production of balloons, finger cot, condom, breathing bag, and other latex dipping products.

■ Specifications:

Physical Properties		Size Tolerance (mm)	
Hardness(Mohs)	9	Height	total length: fingers: +/-2
Water Absorption	<0.25%	Circumference	fingers: +/-2 others: +/-3
Fastness to Acid	≥99%	Base plate	55×25mm +/-2mm
Fastness to Alkali	≥99%	Thickness	3mm+/-0.5
Heat Fastness	400 °C	Remark	Customer' s tolerance is available upon requests
Flexural Strength	800 kg/cm2		

■ Package:

In standard carton box packed on the wooden cage.

■ Advantages:

- It is not affected by high or low temperature (can withstand all reasonable temperature changes and will not soften or warp in use)
- It is stronger than glass and superior to wood.
- It is unaffected by acids, steam or most other chemicals.
- It is less costly compared to other materials.
- Higher quality of the end product it yields as compared to some other material used. Ceramic formers are completely vitreous. They do not stick and cause the rubber to tear. The best advantage is that the former can be used in unglazed latex Dipping Processes.
- much longer service life than other material

Various Size and Type of Glove Former

Different Type of Glove Former

Hand Former

Foot Glove Formers

■ **Regular Size:**

Type of Former	Type Code	Size Mark	Height(mm)	Palm Cire.(mm)	Wrist Cire(mm)
